

# Clear the land. And the sky.

**Retrofit your Cat<sup>®</sup> machine and meet emissions requirements for your agriculture business.**

**Contact your Cat Dealer for the retrofit solutions that are right for your business.**

For farmers, caring about the environment – the water, the land and the air – is just a part of the job. At Caterpillar, we share your concerns. That's why our Emissions Retrofit solutions are designed to help you improve air quality by reducing your machine emissions. What's more, your Cat Dealer knows exactly what to do to meet the standards in your area. So, from planting to harvesting, you can ensure successful crops for many years to come. **Caterpillar. The difference counts.<sup>™</sup>**

**CATERPILLAR<sup>®</sup>**

# Leave an impression on earth. Not in the air.

**Retrofit your Cat<sup>®</sup> machine and meet emissions  
requirements for your light construction business.**

**Contact your Cat  
Dealer for the retrofit  
solutions that are right  
for your business.**

With a Cat machine, you can make a difference in the world just by doing your job. Our Emissions Retrofit solutions are designed to help you improve air quality by reducing your engine's emissions. Simply ask your Cat Dealer for the right solution for you. So, whether you're a contractor or a construction manager, you'll be better able to meet the standards in your area. You'll qualify for new contracts. And, you'll leave behind a better landscape – one job at a time. **Caterpillar. The difference counts.<sup>™</sup>**

**CATERPILLAR<sup>®</sup>**

# Make your mark on the ground. Not in the air.

**Retrofit your Cat® machine and meet emissions requirements for your heavy construction business.**

**Contact your Cat Dealer for the retrofit solutions that are right for your business.**

With today's stricter emissions requirements, you need more than a powerful machine to do demanding construction work. You need lower emissions, too. At Caterpillar, we can help you with both. Our Emissions Retrofit solutions are designed to reduce your engine's emissions without impacting performance. Ask your Cat Dealer for the best way to meet local standards. So, as you build the roads, bridges and buildings that support our world, you'll be improving the air, too. **Caterpillar. The difference counts.™**

**CATERPILLAR®**

# Make progress on land, by sea and in the air.

**Retrofit your Cat® stationary engine and meet  
emissions requirements for your business.**

**Contact your Cat  
Dealer for the retrofit  
solutions that are right  
for your business.**

Wherever you need power, Caterpillar is there. And with our Emissions Retrofit solutions, your Cat engines will run cleaner than ever before. Ask your Cat Dealer how to achieve immediate, significant emissions reduction from your diesel or gas stationary engine. You'll be able to meet today's stricter emissions requirements, whatever the application. So, from petroleum to power generation, manufacturing to mining, you'll be better equipped to do business – everywhere. **Caterpillar. The difference counts.™**

**CATERPILLAR<sup>®</sup>**

# Enrich the fields. Without changing the view.

**Replace your Cat® irrigation pump engine and meet emissions requirements in your area.**

**Contact your Cat Dealer for the retrofit solutions that are right for your business.**

Profitable crops can be hard to come by. And today's stricter emissions requirements have added a new challenge for your business. Let Caterpillar help you lower the emissions from your irrigation equipment – and protect your bottom line. Ask your Cat Dealer about replacing your irrigation pump engines with systems built to reduce emissions levels. It's the ideal way to keep your pumps running and acreage producing, while improving air quality, too. **Caterpillar. The difference counts.™**
