

# Today, Dave securely managed servers in the UK, Chicago and St. Louis — without leaving his daughter's recital.

With the best-of-breed security in Avocent DSView® 3 software, the world can finally revolve around you. DSView® 3 software empowers you to securely manage your entire data center — even when you're thousands of miles away. Avocent's exclusive features, like virtual media support, ensure that only authorized users can access your devices, while also extending secure access and control to your "lights out" operations. Let others talk about security. Only Avocent field-proven security gives you true peace of mind.

# Today, Bob rebooted servers in San Diego, fixed a network in Albuquerque and celebrated the team's big win in D.C.

With Avocent data center management solutions, the world can finally revolve around you. Avocent puts secure access and control right at your fingertips — from multi-platform servers to network routers, remote data centers to field offices. You can manage everything from a single screen, from virtually anywhere. This means you can troubleshoot, reboot or upgrade your data center devices — just as if you were sitting in front of them. Avocent simplifies your workday. What you do with the extra time is up to you.
