

# Bridge the gaps in every child's education.

**Dell and Intel offer one-stop solutions to help you improve the learning environment.** Dell School Architecture (DSA) is our approach to helping you effectively leverage technology to enable education. Aligning with the requirements of No Child Left Behind (NCLB) legislation, Dell offers everything you need to enhance your school district, from individual components to complete solutions. **Dell Services** conducts a **half-day workshop** to assess your environment. Then we work with you to crystallize your vision, set attainable goals and help prioritize your next steps for meeting your district's unique requirements. What's more, the Intel-supported **Managed Learning System® Framework** works seamlessly with DSA to integrate technology into the classroom. Working together with our software partners, we help you create a dynamic, interactive learning environment.

## Dell School Architecture: Enabling K-12 Education

A framework of solutions, enabling educators to effectively leverage technology
