ANGELA	Handwrite notes	Collect signatures	Type information	Record thoughts	E-mail colleagues	Give presentations	Work wireless	Work on corporate network	Use current applications
In the ward	•	•		•		•	•	•	•
At the front desk			•		•		•	•	•

**In the ward:**

Angela, a nurse at a busy Chicago hospital, has shifts filled with non-stop action. Using the lightweight Motion M1200 Tablet PC, she can move easily throughout the ward, handwriting notes directly into the hospital's database.

**At the front desk:**

While standing at the front desk, Angela uses her Motion M1200 Tablet PC to reference prescription data and e-mail colleagues. She's able to focus on the welfare of her patients — working the way she wants to work.

# DESIGNED TO WORK THE WAY YOU DO.

Business today occurs far beyond the walls of the typical office. The workforce is increasingly mobile. And these employees require tools that can adapt to the rapidly changing digital workplace.

While notebook computers and handheld devices are more popular than ever, they only offer a stepping-stone to mobile computing. Handhelds are not powerful enough to be true, multi-function computers, and traditional "clamshell" notebooks are not practical for many mobile users—since the devices cannot be used while walking or standing, and often weigh more than four pounds. As a result, mobile users have been forced to rely on an awkward combination of desktop PCs, notebooks, handhelds and pen devices to complete their work. There's been no single, powerful tool for being as productive as possible when away from one's desk.

Until now. Enter the Tablet PC. This new type of computer puts the full features of Microsoft® Windows® XP Tablet PC Edition in a portable device, along with pen and speech capabilities. So employees can bring the power of the PC into more places than ever.

**Introducing the first Pure Tablet PC.**

It's time for a revolution in the way people use computers. And Motion Computing is ready. A new company with deep technology roots, Motion Computing's sole mission is to improve the computing experience for mobile users. Our Pure Tablet PCs are designed to work the way you do — providing the industry's best integration of ultra-mobile computing and Windows XP functionality.

**Working the way you want.**

The M1200 Tablet PC from Motion Computing is an extension of your mind and your methods. It is designed from the ground up to adapt to your work style — not the other way around — for utmost ease of use. With one hand, you can dock or undock the Pure Tablet PC. Select different viewing modes, landscape or portrait. And Motion makes a full line of accessories that are made for the way you work, including slim portfolio cases and desktop stands for ad hoc presentations.

Now, you can use your computer in the way that works best for you. The Motion M1200 Tablet PC enables you to create files and store information by simply writing directly on the screen with your Motion pen, typing with a keyboard or speaking into the microphone. You can use the Pure Tablet PC just as you would use a pad of paper and a pen — creating a completely natural writing experience. And the Motion pen also works like a mouse.

**Enjoying Pure Tablet accessibility.**

Motion's lightweight, ergonomic Pure Tablet design delivers maximum ease of use — in a PC the size of a spiral-bound pad of paper. Its spacious 12.1-inch screen is 35 percent larger than the 10.4-inch screen others offer. And its less than 1-inch thick dimensions make it comfortable to hold and use. Perfectly balanced, there is no unwieldy clamshell design — or hinges to wear out.

- › Multiple modes: Tablet or full-function desktop with docking station, keyboard and accessories
- › Data input by keyboard, pen or microphone
- › Fully integrated 802.11b wireless network technology
- › Independent networking for on-the-fly collaboration

PAUL	Handwrite notes	Collect signatures	Type information	Record thoughts	E-mail colleagues	Give presentations	Work wireless	Work on corporate network	Use current applications
On the road	•	•		•	•	•	•	•	•
In the office	•		•		•		•	•	•

**On the road:**

While on the road for a pharmaceutical company, Paul wears a variety of hats. With the versatile Motion M1200 Tablet PC, he gives presentations to doctors and gets them to electronically sign off on the material on the spot.

**In the office:**

At the regional sales office, Paul connects to the wireless network with his Motion M1200 Tablet PC and sends the latest updates to the corporate office. He makes full use of the company's applications — being fully productive from anywhere.

# ULTRA-MOBILE COMPUTING.

Motion Computing leads the Tablet PC market by featuring:

**Customer-oriented product design**

The Motion M1200 Tablet PC is designed from the ground up to adapt to your work style for maximum ease of use. Motion conducted extensive customer research to determine the right combination of features and design for producing the best possible user experience.

**Complete product family**

The Motion M1200 Tablet PC is part of an innovative line of docking solutions, accessories and software optimized for the mobile user.

**Rapid technology integration**

Motion has plans for continuous innovation in the mobile category. This includes being first to market with a Pure Tablet PC featuring a 12.1-inch display and full compatibility with Microsoft Windows XP Tablet PC Edition.

**High quality and value**

The Motion M1200 Tablet PC provides you with the power of ultra-mobile computing, robust design and a flexible form factor — ensuring that you get the most out of your investment.

**Simplifying life for mobile users.**

The Motion M1200 Tablet PC gives you the freedom to work from anywhere. Designed with durability and reliability in mind, the Motion Tablet PC is perfect for anyone on the go, such as sales representatives, healthcare professionals and students. It packs all the power and functionality of a PC into an ultra-mobile wireless tablet so you can run your existing applications from anywhere.

**Working without restrictions.**

Freed from the clumsy hinges of the traditional notebook, the Motion M1200 Tablet PC offers the convenience and natural feel of a pad of paper and a pen. It is easy to carry at under three pounds, includes instant-access capability and provides a long battery life. Plus, the Motion Tablet PC works in multiple modes — as a Tablet or as a full-function desktop with a docking station, keyboard and other accessories.

Motion Computing's goal is to deliver a seamless, natural experience. Whether you want to handwrite notes using the Motion pen directly on the 12.1-inch LCD screen, typing with a keyboard, or speaking into the microphone — the choice is up to you. There is no need to learn new operating systems, interfaces, handwriting formats or applications. You can use the Motion pen to edit within any application, and have your notes converted to text. And fully integrated 802.11b wireless network technology means that you can get work done while on the move.

**Connecting with colleagues, anywhere.**

Whether your job demands that you work at a desk, meet with clients, roam your building or travel the country, the Motion M1200 Tablet PC adapts easily to your needs. You can connect to nearby wireless users on the fly for completely portable, peer-to-peer networking and collaboration. This "instant" LAN lets you share files within a group of colleagues. Plus, digital white-boarding using the easy pen interface lets you interact directly with others right on your Pure Tablet PC — and save and print the notes for later reference.

- › Microsoft Windows XP for Tablet PC Edition, Intel Mobile Pentium III 866 MHz ultra low-voltage processor and up to 60 GB storage
- › IEEE 1394 capability and USB ports
- › Up to 1 GB of RAM
- › Supports a variety of accessories — cameras, CDs, printers and phones

PURE | POWER

NICOLE	Handwrite notes	Collect signatures	Type information	Record thoughts	E-mail colleagues	Give presentations	Work wireless	Work on corporate network	Use current applications
Out with clients	•	•		•	•	•	•	•	•
At home	•		•		•		•	•	•

**Out with clients:**

Nicole, a real estate agent, needs technology that enables her clients to make immediate offers. With the Motion M1200 Tablet PC, she's able to pull up a contract on the spot, have the customer sign it and then send it to the seller's agent.

**At home:**

Working at home, Nicole uses her Motion M1200 Tablet PC to look up new listings for her clients while watching her kids do their homework. She's able to use one tool to meet all her needs.

# PUTTING TECHNOLOGY TO WORK FOR YOU.

Motion Computing has put together the best ultra-mobile computing technologies and features to meet the specific needs of Tablet PC users. Several technology trends have made the Motion M1200 Tablet PC possible:

**Hardware technology is now available**

Miniaturization of components has advanced significantly. Battery life can now support usage for longer periods of time. Low-power microprocessors run at speeds comparable to desktop PCs. And memory is now available in higher-density packages.

**Wireless technology is real**

Wireless network technology is available and inexpensive. It already exists in places such as hotels, coffee shops and airports.

**Microsoft has embraced the Tablet PC as a platform**

Microsoft has created a mainstream operating system specifically for the Tablet PC, recognizing pen input and ink as a data type. At the same time, handwriting recognition software has become more accurate.

**Mobile computing is growing**

Companies are migrating to mobile solutions. E-mail and Internet access are increasingly a part of everyday jobs. Customers require integrated experiences and technologies that are easy to use.

**Adapting to any work scenario.**

The Motion M1200 Tablet PC provides robust desktop functionality in a streamlined design. The Microsoft Windows XP Tablet PC Edition runs all Windows, current and proprietary applications, so you don't have to sacrifice performance to get the convenience and mobility you want. Access your e-mail, calendar, project files and complete databases at anytime — with no compromises, synching or porting of applications. You have the full fidelity of data with no loss of formatting. Plus, the Pure Tablet PC software lets you edit or annotate right on the screen, with a simple stroke of the pen.

**Performing at your peak.**

With an Intel Mobile Pentium III 866 MHz ultra low-voltage processor and up to a 60 GB hard drive, you won't have to worry about speed or storage. And the fan-less design allows for quiet operations. You can also use IEEE 1394, one of the fastest connectivity options available today, or one of the USB ports, whichever is more convenient.

**Getting exactly what you need.**

Motion M1200 Tablet PCs offer a powerful platform that can grow with you as your needs change. You can use all the same applications that you use today to do your work. Add up to 1 GB of RAM. And connect all the accessories you need, including CD or DVD drives, cameras or portable printers. You can even install a wireless cellular card that allows you to use your Pure Tablet PC as a wireless phone.

Motion Computing provides freedom and power by using breakthrough design to create the first truly human-focused Pure Tablet PCs — for the ultimate in mobility and productivity.
