**Dell Campus Architecture/BB
:30**

Today's college students depend on technology like never before. At the same time, more professors, administrators and researchers use technology to enhance the learning experience.

With all the technology needs popping up on your campus, how will you ever keep up?

Introducing the Dell Campus Architecture™, a new way to think about your campus technology. From assessments to hardware, software to services, Dell Campus Architecture offers everything you need for campus computing.

We invite you to take a self-guided tour of our solutions now.

DELL CAMPUS ARCHITECTURE™

The comprehensive framework for your campus computing needs — from dorms to classrooms, research labs to administrative offices.

At the heart of your campus are the buildings and classrooms in which students learn. By combining new technologies with personal computing, you can create interactive learning spaces. Dell can help with:

- Dell Intelligent Classroom™ — connect your classrooms with vast amounts of information, images and sounds; also get assessments, training, service and support
- Curriculum Management Solutions — Dell has partnered with companies such as Blackboard, Microsoft and SonicFoundry to provide the ideal distance learning solutions enabling anytime, anywhere learning.
